

Virtual Offices

What if you don't require an office on a full time basis?

Our Virtual Office facility provides many advantages of an office in a commercial centre without the need to rent office space.

A KPG Virtual Office is an office without a physical presence. However, our clients receive a comprehensive mail and message handling service, call forwarding and access to our business centre; our centre may also be used as a registered office.

This service provides a prestigious address for your business, and no one needs to know you aren't present in the office. Our clients can even book out a meeting room when required.

A Virtual Office allows you to work from home with the backing of a major business centre, but at a fraction of the cost.
